Vocal variety plays a vital role in a speech.

A good speech should have the balanced mixture of Volume, Pitch and Quality.

1. Volume: - If you are able to control your loudness along with smoothness, that is acceptable and appreciated by the audience. Volume level also depends on the size of room and the audience.
2. Pitch: - It is advisable to vary your pitch as you speak. The speech should not be monotonous. The pitch should be selected as per the emotions of the ideas that you are presenting.
3. Quality:-Your speech should sound natural and your voice should show confidence. It should be such that it is pleasant for the audience. So feel relaxed while giving a speech.
